

Model 2KW - 12

Output Voltage is adjustable from 8.75 to 14.5 Vdc.

150 Amp output.

No RF noise! -90dB down with spectrum analyzer connected to the output of the supply.

Regulation from no load to full load is less than 500mv change.

Size 10" x 5" x 2"

Built in a stainless steel double shielded box with RF noise filters on both the input and output.

Input VAC range is 100 -240vac. Fully auto-range, no jumpers or switches needed.

Input circuit breaker protected.

Built is over voltage and over current shut-down, Short circuit proof. To reset power down supply for 15 secs.

Digital voltage and current display.
